## WORK EXPERIENCE

### Senior Software Engineer

Ruhoon Technology - Oversea - 2014 to Present

There were 2 projects that were approaching on my friend's company from China. We've designed and developed the whole app from scratch. The backend were LAMP(ThinkPHP) & Openfire (Xmpp framework) & NodeJS (cloud push notification). We use third-party CDN/EFS/CACHE technic that are similar to (Amazon CDN, Amazon ElastiCache, Amazon EFS) in case of large traffic and huge amount of data storage. These products are well known and you may search on Google. They were [www.qingtajiao.com](http://www.qingtajiao.com) and [www.caryu.net](http://www.caryu.net). Now I am returning back to New York City or San Francisco to look for another opportunity as a Software Engineer.

Salary: \$60-70k

### Software Engineer

Leia - New York, NY - 2013 to 2014

It was a startup company creating ecommerce. Our developer were having lots of discussion with project manager and UI about the structure of the app. I was responsible on the both frontend and backend development using lamp with Codeigniter framework during the development and also use socket.io for help desk development and third party api from UPS, Authorize.net & more.

Salary: \$50k

### Software Engineer Freelancer

Self Employed - 2010 to 2012

Work with friends on project from oversea. We develop cross platform application from web app to portable device. Skills we participated were the mostly latest technology(html5(css&js framework), php(lamp, mvc framework), java(android, struts, spring, hibernate, &more), objective-c, etc). We had learned a lot from those projects and had great experience.
