Academy of Art University, San Francisco, CA -- 2011-present

Master's of Art in Multimedia Communications

Shanghai Normal University, Shanghai, China -- 2011

Bachelor of Piano Performance

Cover Letter

Hi! My name is Xun Zhang and I am a talented video editor and videographer. I also have talent as an on-camera reporter. But I prefer to be behind the camera. I am most interested in editing and videography. There are many examples of my work on my website that show my talent and experience. And I'm very happy with what I learned at the Academy of Art University.

My undergraduate degree was music performance. So it was a big challenge for me to get a Masters in Multimedia Communications. I have been studying media for two years. It might not be a long time for other people, but I learned something new and never stop learning. I have musical knowledge so I have a special feel for choosing music for video.

Basically, I am a video editor, videographer and also a creative person. I am full of energy and eager for a job in multimedia. I would love being a professional in the media field and to keep on learning new things.
